Date: October 15, 1999

Subject: Statement of support included in labeling for (Product name): **OXY PROTEIN PLUS™**
Label date to printing: October 4, 1999

This is to notify you that En Garde Health Products (address as shown above) has included the following statement of support, on labeling for the product name shown above.

“Oxygen enhanced to support maximum absorption and use of these nutritive elements in the body.”

“Highest quality, fully balanced protein, with vitamins and minerals; plus supplements of tools your body needs (Xeronine, sulfur and oxygen) to effectively absorb and use the proteins, vitamins and minerals.”

“The ideal “fuel for the fire” for athletes and others with high energy demand, far surpassing the so-called “energy drinks” because the Xeronine (from pure Tahitian Noni plant extract) can help to form whole protein from partial proteins; and the sulfur (from MSM®) and oxygen (from the only double buffered stabilized oxygen product, Dynamo®) can help the body integrate and use them.”

“Useful for everyone and ideal for older people, since — in addition to being an excellent antioxidant — it supports maintenance and regeneration of muscle, skin, bone and cartilage.”

This memo is to certify that the statement contained on the labeling and in this notice is complete and accurate, and that we have substantiation that the statement is truthful and not misleading.
